### Equipment

Oil-immersed and cast-resin transformers, prefabricated MV/LV substations, skid and containerised systems, project-specific HV equipment and transformer accessories.

### OEM responsibility

Veltrium defines the project specification, selects qualified manufacturing partners and coordinates quality, documentation and delivery under its brand. Manufacturing is carried out by partner factories.

### Project engineering

The technical offer is based on the customer specification, single-line diagram, network requirements and delivery constraints. Guaranteed data, drawings, deviations and interfaces are agreed for the selected design.

### Quality and delivery

Inspection milestones, factory tests and documentation are agreed with the project. The accepted offer identifies the transport conditions, importer, EU compliance responsibilities and any local site services.

### Commercial service

First reply within 48 h. Standard-project quotations are generally issued within 5 working days once essential data is complete. The indicative 15-18 week distribution target and the 24-month warranty are detailed in the accepted offer.
